COMPASS 31 is an easy self-questionnaire for autonomic symptoms validated in diabetes for cardiovascular autonomic neuropathy (CAN) and diabetic polyneuropathy (DPN). Electrochemical skin conductance (ESC) is proposed as a reliable easy test for sudomotor or sweating function. In this study, the combined use of these tests improves their diagnostic performance, reaching sensitivity over 90% and 80% and specificity around 80% and 90% for CAN and DPN, respectively.
