zIn order to address the various demands that are imposed on diesel vehicles, the fuel injection system (including the injection pump and nozzles) plays a significant role because it directly affects the performance of the engine and the vehicle.

SERVICE MANUAL

The manual pump is installed along with the feeder pump and is used to eliminate air bubbles in the diesel system, which is usually known as "diesel system bleeding". The air may "enter" in the system, for example, when the fuel filters change is made, or when the diesel injection pump maintenance is made.
