Cataract Surgery from Routine to Complex: A Practical Guide
Also known as lens replacement surgery, cataract surgery is a routine treatment for cataract, or the clouding of the eye ' s lens. In the procedure, a surgeon makes a small incision in the cornea of the eye, takes out the faulty lens, and replaces it with a prosthetic called an intraocular lens (IOL).

Cataract Surgery: What to Expect on the Day of Surgery
Uncomplicated cataract surgery usually takes no longer than about 10 minutes to perform. Immediately after the surgery, you will rest in a recovery area until you are less groggy from sedation or anesthesia. Typically this takes about 30 minutes to an hour. You must have someone available to drive you home after the procedure.

Cataract surgery recovery: 8 tips to minimize recovery time

The operation Cataract surgery is a straightforward procedure that usually takes 30 to 45 minutes. It's often carried out as day surgery under local anaesthetic and you should be able to go home on the same day. During the operation, the surgeon will make a tiny cut in your eye to remove the cloudy lens and replace it with a clear plastic one.

Cataract surgery - NHS

The ophthalmologist will make a tiny cut in your eye to remove the cataract and will normally insert a plastic replacement lens so that you can see clearly. This will usually take around 15-45 minutes. You will not normally need stitches, but your eye will be covered to protect it from knocks after the operation.

Cataracts Symptoms & Treatment | Specsavers UK

gently wipe from the inside (near your nose) to the outside corner of your eye. don't wipe inside your eye. don't wash your eye out with water. don't press on your eye. During the first 2 weeks, you may need to clean your eye twice a day because the drops and the healing process can cause slight stickiness.

Cataract surgery - Recovery - NHS

Typically, the eye will be fully healed within 8 weeks after surgery. Most people can go back to their normal routine within a few days. Depending upon your specific needs and surgery, your cataract surgeon may give you other or additional instructions and recommendations for your cataract surgery recovery.
