Traditional scholars of philosophy and religion, both East and West, often place a major emphasis on analyzing the nature of "the self." In recent decades, there has been a renewed interest in analyzing self, but most scholars have not claimed knowledge of an ahistorical, objective, essential self free from all cultural determinants.

The new research paints a much richer picture of diversity in cultural models of selfhood. It shows that Western cultures tend to emphasize certain ways of being independent (e.g., being different from others, self-directed, and self-expressive), but not others (e.g., being self-interested, self-reliant, and consistent across contexts).

Influence of Culture on Self-Concept. According to Warder, Culture refers to the behavior and belief characteristics of a particular society, community or ethnic group. Culture matters to the extent that it is normal for different experiences to be felt by the individuals in a given society. It is worth noting here that the perspectives in cultural matters usually provide a new insight into the psychological processes.

~~Influence of Culture on Self-Concept – Payperwide~~

One of the most intriguing philosophical aspects of culture is the methodology by means of which its specimens have been and are studied. It seems, in fact, that in order to study a culture one has to remove herself from it, which in some sense it means that the only way to study a culture is by not sharing it.

The psychology of self is the study of either the cognitive and affective representation of one's identity or the subject of experience. The earliest formulation of the self in modern psychology forms the distinction between the self as I, the subjective knower, and the self as Me, the subject that is known. Current views of the self in psychology position the self as playing an integral part ...
