### Fractions, Decimals & Percentages - Primary Resources

It can be quite straightforward to convert a decimal to a percentage. You can simply multiply the decimal by 100 to turn it into a percentage. For example: What is 0.67 as a percentage?  $0.67 \times 100...$

### Order and compare fractions, decimals and percentages by ...

Convert 80% to a decimal ( $=80/100$ ): 0.8. Write down the decimal "over" the number 1: 0.8 1. Multiply top and bottom by 10 for every number after the decimal point (10 for 1 number, 100 for 2 numbers, etc):  $0.8 \times 10\ 1 \times 10$ . This makes a correctly formed fraction:  $\frac{8}{10}$ . Then Simplify the fraction:

### Decimals, Fractions and Percentages

What would 15% be as a fraction and a decimal? Fraction - The percentage becomes the numerator and denominator becomes 100.  $(\frac{15}{100})$  Decimal - Divide 15 by 100.  $15 \div 100 = 0.15...$

### Write percentages as fractions and decimals - Year 6 - P7 ...

This lesson focuses on fractions whose denominators are factors of 10, 100, or 1000. Students identify and rewrite equivalent fractions with a denominator that is a power of 10. They also order decimals and rewrite fractions and decimals as percents.
