Read PDF Plant Domestication In The

Domestication has played an enormous part in the development of humankind and material culture. It has resulted in the appearance of agriculture as a special form of animal and plant production. It is precisely those animals and plants that became objects of agricultural activity that have undergone the greatest changes when compared with their wild ancestors.

Plant studies show where Africa ' s early farmers tamed some ...

The Middle East was the first place where people domesticated plants (ca. 8300 BCE) and animals (ca. 7500 BCE), ushering in the Neolithic period with its characteristic village economies based on food production. However, domestication of plants and animals took place independently in a number of different parts of the world. Local cultures in North America, Mesoamerica, South America, China, and Africa each domesticated their own unique sets of plants and animals, and they did so by ...
