## **Endoscopy - Hambleton Equine Clinic**

An endoscopy is a procedure used in medicine to look inside the body. The endoscopy procedure uses an endoscope to examine the

# File Type PDF Respiratory Endoscopy

interior of a hollow organ or cavity of the body.

Unlike many other medical imaging techniques, endoscopes are inserted directly into the organ. There are many types of endoscopes. Depending on the

# File Type PDF Respiratory Endoscopy

site in the body and type of procedure an endoscopy may be performed either by a doctor or a surgeon. A patient may be fully conscious or anaesthetised during the procedure. M

# File Type PDF Respiratory Endoscopy

## **Endoscopy - Wikipedia**

An endoscopy is a procedure where organs inside your body are looked at using an instrument called an endoscope. An endoscope is a long, thin, flexible tube that has a light and camera

# File Type PDF Respiratory Endoscopy

at one end. Images of the inside of your body are shown on a television screen.

## **Endoscopy - NHS**

Upper respiratory endoscopy involves placing a flexible

# File Type PDF Respiratory Endoscopy

camera into the horse's nasal passages. From the nasal passages, the turbinates of the nose can be assessed and the camera advanced all the way back to the horse's larynx and pharynx, where the luminal

# File Type PDF Respiratory Endoscopy

structures can be assessed visually.
