Questions: who, what, when, where and why? What will the patient or caregiver do? Customize the goal for the patient's issue(s).

~~SMART Goals in Physical and Occupational Therapy: Overview~~

...

Let's break these down from an occupational therapy perspective. S- Specific. Often times, it seems simple enough to create a specific goal; however, without being specific about the academic or functional progress you would like to see, you are unable to also make this goal MEASURABLE (which is the next part).

Goal setting can take much time and still be vague. A practical and standardized method is needed for being specific. Method: A novel approach to writing specific, measurable, achievable, realistic/ relevant and timed (SMART) goals is developed here. Each goal can be built up by using up to four parts: the target activity, the support needed, quantification of performance and the time period to achieve the desired state.

The student is vital for success in occupational therapy.

~~OT IEP Goals — How School OTs Can Write SMART Goals~~

Strong goals give a sense of purpose and inform a person's decisions about everything they do. Learning about a person's goals is like a window into their values. Much like values, goals can be a powerful tool in therapy. They can be used for motivation, a tool for exploration, or a guide for making decisions...
