Klimburg is a leading voice in the conversation on the implications of this dangerous shift, and in *The Darkening Web* he explains why we underestimate the consequences of states' ambitions to project power in cyberspace at our peril. Not only have hacking and cyber operations fundamentally changed the nature of political conflict - ensnaring states in a struggle to maintain a precarious peace that could rapidly collapse into all-out war - but the rise of covert influencing and information ...

Having read Griffith & Klimburg's book "The Darkening Web - The War for Cyberspace", I have the following thoughts: 1.) Given what they write about happening in the '80's, 90's and Millennium that I had no idea about, it seems clear that no matter how much I read, I have really no idea about what is actually happening right now.

Silk Road was an online black market and the first modern darknet market, best known as a platform for selling illegal drugs. As part of the dark web, it was operated as a Tor hidden service, such that online users were able to browse it anonymously and securely without potential traffic monitoring. The website was launched in February 2011; development had begun six months prior.
